PROFILE

Data Analyst with 2+ years in SQL-based analysis, automated reporting, and Power BI dashboards. MSc Data Analytics graduate with Databricks and dbt project work, reducing manual reporting by 20% and improving reporting efficiency by 15%.

SKILLS

- **BI Analytics & Programming:** Power BI (DAX, Power Query), Tableau, Python (Pandas, NumPy), Excel
- **Databases & Cloud:** PostgreSQL, SQL, Google Cloud Platform / BigQuery (basics)
- **Data Engineering & Platforms:** Databricks, dbt, PySpark, Spark SQL, Delta Lake, ETL/ELT Pipelines
- **Tools:** Git, GitHub

SELECTED PROJECTS

- | | |
|-------------------|--|
| 07/2026 – 09/2026 | Air Freight Cost and Delivery Reliability Analytics (Power BI) <ul style="list-style-type: none">• Built a four-page Power BI report on 10,324 shipments and \$68.8M of freight spend, modelling the source data into a star schema with Python and DAX.• Showed air freight costs 6x more per kilogram than ocean for only 8 points of on-time performance, and identified \$1.79M of air spend with no delivery justification. <u>Github Repository</u> |
| 12/2025 – 01/2026 | E-commerce Customer Journey & Revenue Analytics on Databricks <ul style="list-style-type: none">• Analyzed 3M+ e-commerce event records across the sales funnel to identify conversion patterns and revenue trends.• Automated the Databricks reporting pipeline using PySpark, Spark SQL, and Delta Lake, and found the top 20% of products generated nearly 80% of revenue. <u>Github Repository</u> |
| 11/2025 – 12/2025 | E-commerce Marketplace Performance Analytics <ul style="list-style-type: none">• Built a PostgreSQL and dbt analytics workflow with Python and SQL, turning raw marketplace data into clean BI-ready tables for Tableau reporting.• Analyzed 100K+ orders to identify top products, categories, and regions, supporting sales focus and inventory planning decisions. <u>Github Repository</u> |

WORK EXPERIENCE

- 10/2022 – Present

Operations Associate (Part-time)
Flink Expansion GmbH, Berlin, Germany
 - Supported inventory monitoring and operational KPI tracking in a high-volume fulfillment environment.
 - Tracked daily inventory, order flow, and fulfillment issues, supporting stock accuracy, shortage identification, and timely escalation of operational bottlenecks.
- 02/2019 – 09/2021

Data Analyst
Synergen Health Pvt Ltd, Nugegoda, Sri Lanka
 - Developed and automated an operational claim performance dashboard using SQL, Python, and Power BI, reducing manual reporting effort by approximately 20%.
 - Improved reporting workflow efficiency by approximately 15% by optimizing SQL and Python-based data preparation processes for recurring KPI reporting.
 - Analyzed operational and claims data using SQL to identify reporting trends, workflow gaps, and process improvement opportunities.
 - Collaborated with cross-functional teams to define KPI logic, reporting requirements, and business recommendations for performance tracking.
 - Documented reporting logic, SQL validation checks, and data quality processes to improve reporting consistency and accuracy.

EDUCATION

- 10/2023 – 01/2026

MSc Data Analytics (Grade: 1.6)
Berlin School of Business and Innovation, Berlin, Germany
- 10/2021 – 04/2023

MSc Engineering Management
Arden University, Berlin, Germany
- 10/2014 – 12/2018

BSc Engineering
University of Moratuwa, Sri Lanka

LANGUAGES

- English: C1
- German: B2

ADDITIONAL INFORMATION

- Full-time work authorization in Germany.
- Available immediately
